

Inventioneering Club

St. Alban and St. Stephen Infants and Heathrow Airport are offering the opportunity for your Year 2 child to take part in a six week after school course in Science, Technology, Engineering and Mathematics (STEM).

The program will give your child practical experiences to explore technology of the future. We will cover subjects including robotics, coding, exploring construction materials and techniques and renewable energy, while considering how STEM subjects can provide answers to local and global environmental issues.

As well as imaginative weekly projects, every child involved will be helping to construct a fully working wind turbine to be used by school, helping to reduce the school's carbon footprint. We will also send some problem solving activities home with the children and they may need your help with these.

These sessions will run on Wednesdays for a 6-week period for 8 children at a time. The first session will start on Wednesday 3rd May from 3:15 – 4:15 in Class 6. Your child can be collected from the main entrance at 4:15pm. In the event that the club is oversubscribed, there will be a draw for places. Please return your form on Tuesday 2nd May. Parents will be notified if their child has a place on Tuesday.

Child's Name:	Class:
Parent signature & Name:	

I give permission for my child (named above) to attend the Inventioneering Club on Wednesdays after school from 3:15– 4:15pm. Children will be provided with protective clothing and eye wear. As these classes are run in conjunction with Heathrow Airport Ltd I hereby give permission for my child's photo to appear in any Heathrow Literature and/or news coverage about the classes. I understand that the materials used may be hazardous if not used as directed by teachers and give permission for my child to use them.
